Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 2/23/06.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 1-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (6,074,296) in view of Ferchau et al. (4,899,254). Wu (6,074,296) in view of Ferchau et al. (4,899,254) discloses all of the limitations of the claim except for the length of the second fastening element being less than a length of the through hole and that the cap. However, since the applicant has failed to establish any criticality or synergistic results which are derived from the recited configurations, these limitations are considered a matter of obvious design choice. Thus, the applicant's design configurations would have been an obvious improvement to one of ordinary skill in the art with regard to the apparatus disclosed in Wu in view of Ferchau et al. See fig. 2, 51 and 47 of Ferchau et al. See fig. 3, of Wu. Regarding claim 4, see 53.

Claim(s) 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wu in view of Ferchau et al. and in further view of de Boeve et al. (4,549,322). Wu in view of Ferchau et al. discloses all of the limitations of the claim(s) except for both fastening members having corresponding threads. de Boeve et al. discloses the presence of a both fastening members having corresponding threads. See fig. 1, 9 and 10. Hence, one skilled in the art would find it obvious to modify the system of Wu in view of Ferchau et al. to include the fastening members

Art Unit: 3749

having corresponding threads of de Boeve et al. for the purpose of reduction of parts (i.e. removal of the nut in Ferchau et al.).

Response to Arguments

Applicant's arguments filed 3/7/06 have been fully considered but they are not persuasive. In response to applicant's argument that fastening members of Ferchau et al. are for a block instead of the fan, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

Although, Ferchau's second fastening member is not shorter than the through hole, it is submitted that since applicant does not mention this limitation in the specification it is therefore considered an obvious matter of design choice.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

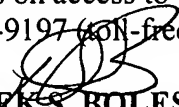

Art Unit: 3749

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention.
